GRADE 11 & 12 DAILY LESSON PLAN	School	DR. JOSE P. RIZAL SENIOR HIGH SCHOOL	Grade Level/Section	GRADE 12-C	
	Teacher	MICAH B. TUGAS	Learning Area/Subject	COMPUTER SYSTEM SERVICING	
	Quarter	4 th QUARTER	Teaching Dates	WEEK 6-7	

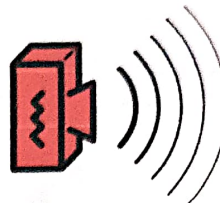

I. OBJECTIVES	A. Content Standard	The learner demonstrates an understanding and familiarity with the underlying principles of wireless networks.
	B. Performance Standard	The learners should be able to apply the knowledge gained in wireless networks for their computer configuration
	C. Learning Objectives	At the end of the lesson, students are expected to: a. know the different types of routers and wireless challenges. b. design a wireless network. c. configure a wireless network. d. reflect on the significance of wireless networks.
II. SUBJECT MATTER	A. Topic/Content	WIRELESS NETWORK
	B. Materials	PowerPoint Presentation, Images, whiteboard marker, T.V, computer, router, crossover cable, UTP cable, router, switch.
	C. Reference/s	https://commotionwireless.net/docs/cck/networking/types-of-wireless-networks/
III. PROCEDURES	A. Routinary Activities	Prayer, Greetings, Checking of Attendance, Classroom Management, Classroom Rules, and Covid-19 Safety Reminders, Collecting of Assignments
	B. Review Of The Past Lesson	Activity: Design a topology of a peer-to-peer connection. Using the pictures presented, 5 Computers (Server/Client), Router, Switch, UTP Cable, mobile phone, laptop, and tablet.  Ask the following questions: 1. What is the Peer to peer connection? 2. How does the Peer to peer connection work?
	C. Lesson Proper	4A's Scheme
	a. Activity	"Pass the Message" Collaborate with your classmates. Allow each player to act out and show the message to another by using gestures or motions. The last player must go to the whiteboard and write the message. If they correctly wrote the message, all of them will receive a point.
	b. Analysis	Answer the following questions: 1. What is the role you play in the activity? 2. What do you think is the connection between your role and the picture?
	c. Abstraction	WIRELESS NETWORK Wireless networks allow us to connect wirelessly. These Wireless signals are electromagnetic waves traveling through the air. These waves can travel some distance depending on the strength of that energy and depending on their frequency. 2.4G Vs 5G Frequency 2.4GHz vs 5GHz WiFi 

Three types of routers

1. Omnidirectional. These can send and receive wireless signals in every direction.

2. Sector. These send and receive wireless signals in a limited arc. Limit the connections these routers make to a wedge-shaped area.

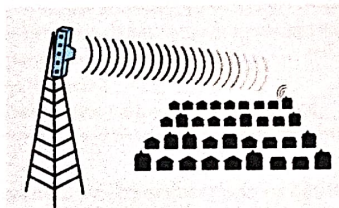

3. Focused. These send and receive wireless signals in a narrow beam. Limit the connections to a single thin line.

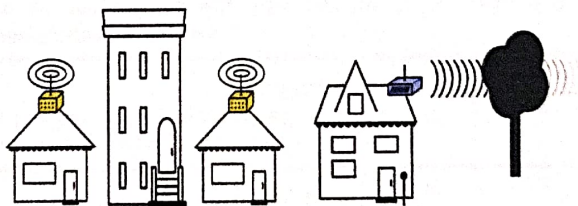

What are the Wireless Challenges?

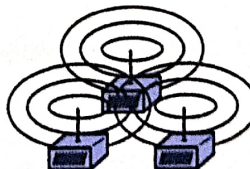

Distance – Wireless signals lose power the further they travel, no matter the type of antenna.

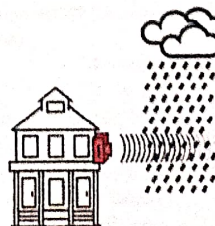

Line of Sight – Wireless signals can encounter total barriers, preventing connections.

Interference – Routers can be too loud, making it impossible for them to hear each other.

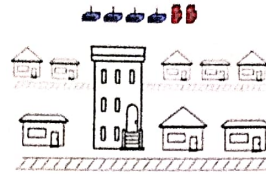

Weather – Weather conditions can disrupt wireless signals.

Activity:

"Let's Plan and Create a Wireless Network for our Community!"
 Based on the Scenario presented on the board, work with your groupmates to plan and design the wireless network in a community. Connect as many buildings as you can with the routers provided. Connect the routers with a solid line. Do it in One Minute.
 Group 1:

Group 2:

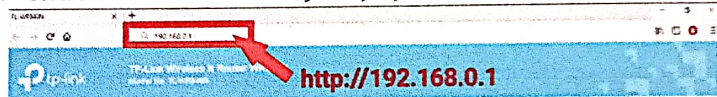

Choose one representative to explain their output. Each group has 60 seconds to explain.

- How did you come up with this plan?
- What are the things you consider in planning wireless networks in your community?

Procedure on how to configure a wireless network:

1. Connect the power adapter to the back panel of the router
2. Insert ethernet cable to Lan port of the router and NIC port of computer
3. Set the IP address of the computer to the same network as the router
4. Set the router's IP address as the gateway in your computer (192.168.0.1)

5. Type in the IP address of the router in the browser and log in
 Username: admin Password: admin
6. Configure SSID and Password
7. Save > Wait for reboot > then connect with your device.

d. Application

Instruction:

Configure a simple wireless network and connect your mobile device to the wireless network and answer the following questions (refer to activity sheet).

1. Why is it important to plan a wireless network connection?
2. Name 3 real-life experiences in which wireless connection is being applied.
3. How do you interact with your groupmates in research or any other school-related group activity?

Pedagogical Approach

Constructivism

Constructivism assumes that all knowledge is constructed from the learner's previous knowledge, regardless of how one is taught.

Teaching Strategy

Collaborative

The students will work together with their group mates/partner.

IV. EVALUATION

Short Quiz

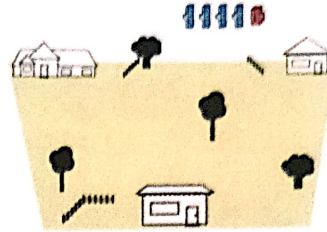

Pen and paper:

DIRECTION: Read the sentences carefully. Choose the letter of the best answer. Use UPPERCASE letters only.

1. allows devices to remain linked to the network yet to roam without any cables unattached, where the signals are amplified by access points, meaning a computer can be far from a router but still be linked to the network.
 - a. network
 - b. wireless network
 - c. configuration
 - d. nodes
2. a type of wireless challenge where the routers can be too loud, making it impossible for them to hear each other.
 - a. interference
 - b. electrical power issues
 - c. line of sight
 - d. weather
3. These send and receive wireless signals in a narrow beam. Limit the connections to a single thin line
 - a. nodes
 - b. access point
 - c. Focused
 - d. Mesh
4. is a type of router that sends and receives wireless signals in a limited arc. Limit the connections these routers make to a wedge-shaped area.
 - a. omnidirectional
 - b. directional

- c. sector d. i eed
5. What are the correct steps in setting up a wireless network?
- I. Configure SSID and password
 - II. Type the IP address of the router to log-in into your browser
 - III. Set up IP Address of router
 - IV. Set up IP Address of computer
 - V. Set up the cross-over cable
 - VI. Connect the wireless connection to your device
- a. I, IV, V, III, II, VI b. V, IV, III, II, I, VI
 c. VI, IV, I, V, II, III d. I, VI, V, II, IV, III

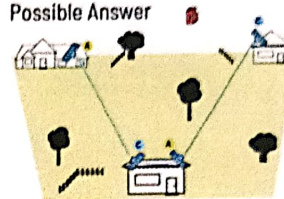

Part 2 : Design your own community network connection
 In this scenario, there is a set of buildings with many trees. Connect as many buildings as you can with the routers provided. Connect the routers with a solid line.

Key to Correction

1. b
2. a
3. c
4. c
5. b

Possible Answer

V. ASSIGNMENT

A. Follow-up

Direction: Draw a map of a community on a clean short bond paper and design your own wireless network using the following antenna/router. Connect the routers with a solid line.
 Submission: Tuesday, May 31, 2022.

B. Advance

Direction: Conduct research and read about the Dynamic Host Configuration Protocol (DHCP). Write it on the yellow pad paper and provide the following:

1. What is DHCP?
2. Describe how the DCHP works.
3. List down the steps on how to configure DHCP.

Submission: Tuesday, May 31, 2022.

Madame:

A Blessed Day!

The Off – Campus Practice Teaching of our Fourth Year Students is about to end and one of its most important activities is the “Search for the Best in Demonstration Teaching”.

Here, the selected students shall showcase the teaching strategies, classroom management and other techniques they have adopted from the Cooperating Teachers of the respective Schools they have been deployed to.

In view of this, I would like to request that this event be conducted face to face inside this campus on July 1, 2022 at 1 pm.

Rest assured that all protocols concerning pandemic shall properly be observed. Only those who were involve in the program shall be allowed to watch the said event.

Your approval is much needed for the success of our program. Thank you so much and more power.

Truly yours,

JULIETA MEDINA-FAJARDO

Head, OED
